AUTHOR	Glazner, Steve, Ed.; Silberman, Gil, Ed.
TITLE	Comparative Costs and Staffing Report For College and University Facilities, 1991-92.
INSTITUTION	Association of Physical Plant Administrators, Alexandria, VA. Association of Higher Education Facilities Officers.
REPORT NO	ISBN-0-913359-72-6; ISSN-0742-7476
PUB DATE	93
NOTE	340p.
AVAILABLE FROM	APPA, The Association of Higher Education Facilities Officers, 1446 Duke St., Alexandria, VA 22314-3492 ($40 members; $90 non-members).
PUB TYPE	Statistical Data (110) -- Reports - Evaluative/Feasibility (142)
EDRS PRICE	MF01 Plus Postage. PC Not Available from EDRS.
DESCRIPTORS	College Administration; Comparative Analysis; Construction Management; Costs; *Educational Facilities; *Employees; Employment Practices; *Employment Statistics; *Higher Education; Institutional Characteristics; Job Performance; Labor Force Development; *Operating Expenses; Salaries; School Personnel; Tables (Data); Unions; Utilities; Wages

ABSTRACT

This publication is a biennial report that presents comprehensive data on higher education facilities staffing, maintenance, and operations. The data were collected in fall 1992 for the 1991-92 fiscal year and resulted in 502 usable surveys. A section of charts, graphs, and statistical reductions: (1) show institutional information; (2) describe the mean dollar cost per square foot of various institutional functions; (3) list the percentage of institutions that reported that the functional responsibility for each of the categories is contracted; (4) show the average number of full-time equivalent employees per institution for each job category; (5) show average annual salaries, exclusive of benefits, by job category; (6) cover the average hourly shop rate that institutions charge; (7) feature percentages of institutions that indicate job categories as unionized or provided by outside contractors; (8) present average utilities costs; (9) list average prices institutions paid for utilities; and (10) tally institutions responding to the survey. Indexes list all institutions in alphabetical order, cross-reference institutions according to classification code, list institution responses by state and country, and group public institutions by region and institution type. A final section contains tables of the "raw" data. (JB)

Preface

APPA: The Association of Higher Education Facilities Officers is pleased to publish the *1991-92 Comparative Costs and Staffing Report for College and University Facilities.* In this report you will find data relating to the various functions classified primarily as maintenance and operations of higher education facilities. This report provides the most comprehensive comparison of facilities management costs and staffing data available.

As facilities managers, we all must strive for continual improvement in our service to the teaching and research missions of our higher education institutions. APPA's biennial *Comparative Costs and Staffing Report* continues to be an invaluable reference toward this end. We encourage readers of this report to be in direct contact with fellow facilities managers whose institutions are similar and whose cost or staffing data suggest that they may have a better idea.

Based upon APPA's years of experience with this information, however, we strongly caution the reader against drawing conclusions without knowing the mission, organizational structure, funding source, geographic location, and other institutional differences that can greatly condition direct comparability.

Data was collected in fall 1992 for the 1991-92 fiscal year. For the first time, the survey instrument was sent on a computer disk compatible with most DOS-based systems. We were greatly pleased at the response of 502 usable surveys, nearly 90 percent of which were returned on disk. This compares with 400 surveys included in the 1989-90 edition of the report.

APPA would like to acknowledge the contributions of several people for their diligent and thorough work on this project. First, Jon Gullette of Vanderbilt University and Pete van der Have of the University of Utah spent countless hours developing and finetuning the survey instrument and instruction booklet. Both provided invaluable assistance in analyzing the raw data and suggesting format and content revisions. Gullette also suggested the development of the computer survey disk. Their contributions to this important APPA project cannot be properly measured or compensated.

Special thanks must go to Gil Silberman of Silberman Consulting Services for his development of the survey disk, generation of all data reports, and creation of the figures. His expert work is in evidence on every page of this report.

We also appreciate the time and effort by members of the APPA staff, including Steve Glazner, Wayne Leroy, and Medea Ranck. Finally, we thank the many institutional members who responded to our survey, and whose participation makes the report so meaningful and useful.

Use of this Report

Every effort has been made to ensure that this report is as meaningful, reliable, and user-friendly as possible. The responses have been checked and corrected, by hand and by computer. We are confident that, taken together, they present a useful picture of college and university costs and staffing.

At the same time, a proper interpretation of these results requires some appreciation of the methods we have used. Following is an explanation of the various sections of the report, a description of the data correction process, and a brief overview of statistical concerns.

Explanation of Report Sections

Charts, Graphs, Statistical Reductions:

Reduction #1 contains institution profile information: gross square footage for the campus buildings, grounds acreage, full-time equivalent student enrollment as of fall 1991, deferred maintenance budget (in thousands), outstanding capital renewal/deferred maintenance (in thousands), employee benefits as a percentage of total compensation, and full-time equivalent physical plant staff size. A series of illustrative charts follows this section.

Reduction #2 describes the mean dollar cost per square foot of various institutional functions: administration, engineering/architecture, building maintenance, custodial functions, grounds maintenance, utility systems maintenance, solid waste disposal, hazardous waste disposal, and motor pool. The functional categories are described in detail in the appendix. Each figure is obtained by dividing cost by the square footage, as reported by the institution. Costs include all wages, benefits, travel, equipment, and outside services. Square footage is the total building area for which the physical plant department provides the particular function. Summary graphs follow this section.

Reduction #3 lists the percentage of institutions that reported that the functional responsibility for each of the above categories is contracted.

Reduction #4 shows the average number of full-time equivalent employees per institution for each job category.

Reduction #5 shows average annual salary by job category, in dollars and exclusive of benefits, and is followed by a series of graphs.

Reduction #6 covers the average hourly shop rate that institutions charge when these employees are billed out to other university departments or outside customers.

Reduction #7 features percentages of institutions that indicate job categories as unionized, or alternately, provided by outside contractors. Twenty-one of the 39 job categories are from the survey form and are described in the appendix. The other 18 (locksmith, security, architect/engineer, utilities, etc.) were abstracted from additional information some schools included with their data.

Reduction #8 presents average utilities costs. Water and sewer are measured in hundreds of cubic feet. The two may be listed together, in which case they appear under a combined column. Purchased and cogenerated electricity are given in kilowatt hours. Natural gas is listed in MMBTU and coal in tons. Coal and natural gas costs include transportation. There is a final column for miscellaneous fuel sources including fuel oil, purchased steam, wood, etc.

Reduction #9 lists the average prices institutions paid for utilities in dollars per hundred cubic foot of combined water and sewage, per kilowatt hour of purchased and cogenerated electricity, per MMBTU of natural gas, and per ton of coal.

Reduction #10 is a tally of how many institutions responded to the survey.

Each of the ten reductions is divided into subsections as follows:

Funding Source—public versus non-public.

Region—Central, Eastern, Midwest, Pacific, Rocky Mountain, Southeastern, Australasian, or Other International. This is determined by the geographic location of the institution (see the APPA region description).

Student FTE—full-time equivalent enrollments are classified as Under 2,000; 2,000 to 4,999; 5,000 to 11,999; 12,000 to 19,999; and 20,000 plus.

Type of Institution—Carnegie Classification, as described elsewhere. Categories include Research, Doctorate Granting, Comprehensive, Liberal Arts, 2-Year/Jr/Technical, Professional/Specialized, and Other Institutions.

Indexes:

The second section of the report is a series of four indexes. The first lists all of the institutions in alphabetical order. The second is a cross-reference of institutions according to FICE code. Institutions without FICE codes, including some medical colleges and institutions outside of the United States, were given arbitrary I.D. codes. Index 3 lists institution responses by state and country. Index 4A contains public institutions grouped by region, and subgrouped by institution type. Index 4B is a similar listing for non-public institutions.

Tables:

The final section of the report contains tables of the "raw" data provided by institutions. Each table contains an "A" listing for public schools and a "B" listing for non-public schools. There are headings for each region, and subheadings by the type of institution. Within each subheading, schools are sorted in ascending order of building area square footage. Except for the final table, schools are identified by I.D. code instead of by name.

Table 1 lists institution profile information, which is summarized in statistical reduction 1.

Table 2 lists institution costs (in thousands of dollars) and building area served (in thousands of square feet) for each function category. The cost per square foot, summarized in statistical reduction 2, is derived by dividing the cost by the building area. The "Contract" row includes a "Y" for each function that is contracted. The percentage of "Y" responses is presented in statistical reduction 3.

Table 3 lists salary information, annual salary, and number of employees reported for each job title. There is also an "hourly shop rate" (see above), and an indication of whether the employees are unionized (U) or outside contractors (C). The total of these line items falls short of the total physical plant staff for institutions that omitted their miscellaneous job categories. Staffing information is abstracted in statistical reductions #4 through #7.

Table 4 contains utility data. In addition to the categories described under statistical reductions #8 and #9, fuel oil is broken down into two classes, and there is an occasional indication of a quantity and type of other miscellaneous fuels. It should be noted that schools reporting water and sewer as separate figures do not show a combined figure, and vice-versa. This is to avoid double-counting any of the institutions when constructing averages.

Data Corrections

All 502 survey responses were hand checked to ensure consistency. Particular attention was paid to spelling of institution names, states, job titles, etc. FICE codes, regions, institution types (Carnegie classifications), public versus non-public funding sources, and student enrollments were checked against published sources and APPA's own computer records. Corrections were made when needed. A handful of requests for unit conversions and other comments required special attention to and manual update of individual surveys.

Visual examination was also required in order to detect and correct obvious sources of data-entry error. These included reporting building area in thousands instead of units, costs in units instead of thousands, functional area square footages according to physical plant size instead of area served, grounds maintenance as grounds area instead of building area, total instead of average annual salary, natural gas in therms or btu instead of MMBTU, and water in gallons or acre-feet instead of hundreds of cubic feet.

Foreign currency figures were converted to U.S. dollars, at the average of the "buy" and "sell" rates quoted by *The Wall Street Journal* for January 1992. These were $0.8654 per Canadian dollar, $0.1285 per Hong Kong dollar,

$0.5408 per New Zealand dollar, $0.2666 per Saudi Arabian rial, and $0.7598 per Australian dollar.

Extra job categories were often included in the survey's comment section or hand-inserted sheets returned with the surveys. Approximately 1,000 of these job descriptions were processed and combined under a total of 39 general categories. If two or more descriptions for a given institution were combined under a single category, the resulting line item is an average, weighted by the number of employees in each description.

Much of the data reported under "hourly shop rate" was in fact hourly wage information. Whenever the reported annual salary was approximately 2,000 to 2,080 times the reported shop rate, or the annual salary was missing, the salary was computed at 2,080 times the hourly rate, and the hourly rate was deleted.

Considerable effort went into analyzing whether numbers that were out of the norm were reporting errors or were indeed correct. Population distributions and linear regressions were run on utilities costs in order to identify common errors in unit conversions. A small cluster of schools, for instance, was found to report natural gas in cubic feet instead of MMBTU.

Finally, a small quantity of extraneous data that could not be reconciled was deleted before the final report was prepared. The lowest and highest 2 to 3 percent of the remainder, in terms of costs per square foot and utilities prices, were disregarded when preparing charts and statistical reductions, but they were included in the indexes and tables.

Statistics Notes

Several biases should be kept in mind when interpreting the information in this report, particularly the statistical reductions.

1. The most important relates to the fact that blanks, zeroes, and unusually high and low data were removed and/or disregarded. There is no provision for distinguishing an institution that has no cogeneration facility, for example, from one that has such a facility but neglected to report it. Consider the result on page 50 that the average cogeneration plant produce 31 million kwh per year, whereas the average amount of purchased electricity is 38 million kwh. Examination of Table 4 reveals that only 41 of the 502 institutions report cogeneration plants.

   Obviously, it is not true that the "average" school produces 31 million kwh, or that nearly half of all electricity is cogenerated. All one can say is that the average amount generated by schools that *do* have a cogeneration plant is 31 million kwh.

2. Where Yes/No percentages are given, "No" responses are not distinguished from nonresponses. On page 24, for example, 14.74 percent report that custodial services are contracted. It is not known how many of the remaining 85.26 percent contract custodial services but failed to respond, and how many do not contract services. What can be said is that nearly twice as many non-public institutions as public institutions re-

sponded "Yes" to this item. This also applies to "union/contract" percentages listed in statistical reduction #7.

3. Most numerical distributions are skewed toward the low end of the range, rather than being symmetrical about the mean. The population typically consists of quite a few zero or blank responses (which are not included), a cluster of schools slightly under the mean, and then a handful of numbers significantly above the mean. *Median* figures, which are not included in this report, are slightly lower than the *mean* figures. In the case of reduction #2 costs per square foot, the median is about 10 percent under the mean.
4. Data are not normalized by size of institution or any other factor. If a large school spends $0.04 on 200 million kilowatt hours of electricity, and a small school spends $0.12 on 3 million, they both count the same and the average cost per kilowatt hour comes to $0.08. The normalized figure would be $0.042.
5. Various institutions account for their costs and other categories in different ways. A fire safety officer may be included in the "miscellaneous" category for one institution and in "environmental/safety" for another. The survey instructions are rather clear, but it is inevitable that there are variations in how institutions have responded.
6. Because the response rate was greater than 35 percent for United States and Canadian APPA member institutions, the data probably represents a good cross-section of U.S. schools. Further, it is remarkable how consistent the international institutions appear when compared to their American counterparts. However, there may be a systematic tendency of one sort of institution to respond more readily, or more completely, than another.
7. Finally, some of the categories contain more schools than others. On page 14, for example, the row of Southeastern research institutions consists of averages for only three schools. If only one of the schools has an unusually high cost figure, it substantially alters the overall average. On the other hand, 23 Eastern liberal arts schools responded to the survey, so these averages are relatively unaffected if one or more schools is a special case.

These statistical concerns are most pertinent to the mean figures in the survey. It would not be correct to construct a hypothetical "average" school by simply combining the averages in each category. Rather, the strength of this survey is its ability to highlight similarities, differences, and trends among various categories of schools, and to illuminate issues that warrant more detailed study. This comment regards the nature of statistics in general, and not just this report. Just as the average American family has 1.8 children, the average college seems to have 1.05 chief facilities officers. It is like the proverbial camper with one leg in the fire and the other leg in the snow. On average, it is said, he is doing all right.

Carnegie Classifications

The following are descriptions of the primary institutional classifications as defined by the Carnegie Foundation for the Advancement of Teaching.

Research Universities: These institutions offer a full range of baccalaureate programs, are committed to graduate education through the doctorate degree, and give high priority to research.

Doctorate-Granting Universities: In addition to offering a full range of baccalaureate programs, the mission of these institutions includes a commitment to graduate education through the doctorate degree.

Comprehensive Universities and Colleges: These institutions award more than half of their baccalaureate degrees in two or more occupational or professional disciplines, such as engineering or business administration, and may also offer graduate education through the master's degree.

Liberal Arts Colleges: These institutions are primarily undergraduate colleges that award more than half of their baccalaureate degrees in arts and science fields.

Two-Year Community, Junior, and Technical Colleges: These institutions offer certificate or degree programs through the Associate of Arts level and, with few exceptions, offer no baccalaureate degrees.

Professional/Special Schools: These institutions provide specialized degrees and include medical schools and medical centers, which award most of their professional degrees in medicine.

Institution ID	Water (CCF)	Sewer (CCF)	Water & Sewer Combined	Electricity (KWH)	Cogenerated Electricity (KWH)	Natural Gas (MMBTU)	Fuel Oil (Gal)	Fuel Oil (Gal)	Coal (Tons)	Other Fuel & Units
RESEARCH INSTITUTIONS:										
003223 - UNIV OF OREGON, EUGENE – 3,877,954 GSF							(#6, PS400)			
Qty:			333,884	44,571,832	10,830,000	288,461	49,756			20,401
Cost:			439,138	1,175,913	96,724	680,768	33,337			744,636
003210 - OREGON STATE UNIVERSITY – 6,036,316 GSF							(BUNKER C)			
Qty:	449,748	449,749		64,005,552		369,157	260,921			
Cost:	293,432	534,262		2,607,374		913,005	106,404			
001317 - UNIV OF CALIFORNIA, SAN DIEGO – 8,186,962 GSF										
Qty:	399,000	399,000		115,598,000		775,300				
Cost:	424,080	496,920		7,606,000		3,045,000				
003800 - WASHINGTON STATE UNIVERSITY, PULLMAN – 9,624,613 GSF							(FUEL OIL)			
Qty:	828,740			120,669,536	14,941,000	286,822	109,028		28,813	969
Cost:	65,163	248,029		4,222,738	179,292	679,539	68,955		1,780,000	1,055
001312 - UNIV OF CALIFORNIA, BERKELEY – 10,000,000 GSF										
Qty:	786,923			142,380,000		136,703				
Cost:	1,165,948	689,457		10,681,951		700,444				
003798 - UNIV OF WASHINGTON – 13,495,792 GSF										
Qty:	971,284	671,101		202,750,064	17,136,000	1,214,245				
Cost:	631,323	1,709,750		6,008,547	253,067	2,973,221				
DOCTORATE GRANTING INSTITUTIONS:										
001620 - IDAHO STATE UNIVERSITY – 2,396,326 GSF										
Qty:	353,275			31,424,116		72,093			3,786	
Cost:	210,210	41,700		1,020,316		194,577			148,592	
001626 - UNIV OF IDAHO – 3,211,760 GSF										WOOD(TONS)
Qty:	502,384			44,746,128		37,071				20,800
Cost:	60,565	42,500		1,580,461		133,187				478,459
003216 - PORTLAND STATE UNIVERSITY – 3,246,784 GSF							(#2)			
Qty:			124,102	29,078,052		85,546	2,260			
Cost:			235,317	1,344,177		209,132	1,378			
001321 - UNIV OF CALIFORNIA, SANTA CRUZ – 3,250,111 GSF							(#2)			PROPANE(GAL)
Qty:	189,061	131,674		16,811,749	15,903,132	332,937	81,366			18,678
Cost:	349,055	402,956		1,622,874	1,061,483	1,027,681	68,032			16,734
002568 - UNIV OF NEVADA, RENO – 3,292,647 GSF							(#2)			PROPANE(GAL)
Qty:	175,987			44,781,608		196,503	132,093			13,674
Cost:	218,885	62,304		2,589,159		715,293	90,267			8,157
COMPREHENSIVE INSTITUTIONS:										
003209 - WESTERN OREGON STATE COLLEGE – 985,757 GSF							(FUEL OIL)			
Qty:			29,974	9,027,820		64,087	7,371			
Cost:			54,648	280,938		149,690	15,402			
011462 - UNIV OF ALASKA, ANCHORAGE – 1,058,955 GSF										
Qty:	28,707			21,072,198		130,667				
Cost:	67,209	45,935		1,572,449		396,719				
003219 - SOUTHERN OREGON STATE COLLEGE – 1,115,611 GSF										
Qty:				10,315,104		62,249				
Cost:		44,671		479,455		173,728	44,301			
001137 - CALIFORNIA STATE UNIVERSITY, FULLERTON – 1,654,925 GSF							(DIESEL)			
Qty:	15,571	7,500		2,492,765		99,556	17,500			
Cost:	127,738	34,066		2,509,001		363,790	14,654			
001146 - CALIFORNIA STATE UNIVERSITY, CHICO – 1,933,986 GSF							(DIESEL)	(GASOLINE)		MOTOR OIL(GAL)
Qty:	112,111	158,636		23,976,372		67,595	500	16,600		571
Cost:	74,021	52		2,184,327		299,145	367	12,235		1,325

Institution ID	Water (CCF)	Sewer (CCF)	Water & Sewer Combined	Electricity (KWH)	Cogenerated Electricity (KWH)	Natural Gas (MMBTU)	Fuel Oil (Gal)	Fuel Oil (Gal)	Coal (Tons)	Other Fuel & Units
COMPREHENSIVE INSTITUTIONS (CONTINUED):										
002569 - UNIV OF NEVADA, LAS VEGAS – 2,157,157 GSF										
Qty:	354,672			60,440,364		79,189				
Cost:	241,486	140,228		2,625,071		241,392				
001616 - BOISE STATE UNIVERSITY – 2,198,007 GSF							(#6)			
Qty:										
Cost:	62,000	70,000		710,000		250,000	4,000			
001139 - CALIFORNIA STATE UNIVERSITY, LONG BEACH – 2,540,000 GSF										
Qty:	1,013,994	193,913		38,949,028	1,088,281	108,141				
Cost:	240,100	161,152		3,463,127	97,312	619,138				
003802 - WESTERN WASHINGTON UNIVERSITY – 2,544,100 GSF										
Qty:	123,000	123,000		20,874,500						
Cost:	102,700	239,300		761,100		441,900				
001063 - UNIV OF ALASKA, FAIRBANKS – 2,594,519 GSF							(#4)			
Qty:	138,669	140,258		206,922	37,639,628		289,336		59,503	
Cost:	122,922	268,775		63,950	1,731,473		186,964		2,407,494	
003771 - CENTRAL WASHINGTON UNIVERSITY – 2,650,802 GSF										
Qty:	213,711	175,371		29,785,464						
Cost:	66,977	36,091		497,631		608,243				
001150 - CALIFORNIA STATE UNIVERSITY, SACRAMENTO – 2,718,159 GSF										
Qty:	96,124			29,155,986		83,707				
Cost:	37,368	41,110		2,097,126		351,812				
001153 - CALIFORNIA STATE UNIVERSITY, NORTHRIDGE – 2,800,000 GSF										
Qty:			200,198	29,558,336		176,847				
Cost:			162,596	2,322,658		634,460				
001151 - SAN DIEGO STATE UNIVERSITY – 4,537,755 GSF							(#2 DIESEL)			
Qty:	136,456	136,456		19,382,660	13,600,410	301,439	1,000			
Cost:	169,187	169,431		1,667,207	630,100	928,843	635			
LIBERAL ARTS INSTITUTIONS:										
008155 - EVERGREEN STATE COLLEGE – 1,267,000 GSF										
Qty:	73,418	73,418		15,769,517		77,371	2,300			
Cost:	50,658	231,267		615,011		281,683	2,599			
2-YR., JR. OR TECH. INSTITUTIONS:										
010390 - WINDWARD COMMUNITY COLLEGE – 92,000 GSF										
Qty:				900,000						
Cost:			20,000	80,000		10,000				
010182 - ROGUE COMMUNITY COLLEGE – 160,000 GSF										
Qty:										
Cost:	2,000	2,000		135,000		15,647				
029231 - TRUCKEE MEADOWS COMMUNITY COLLEGE – 198,878 GSF

Please use the space below to provide us with any suggestions you may have regarding the survey, the computer program, and the published report. We appreciate all your comments.

If you are completing a written survey, please return to APPA Comparative Costs Survey, 1446 Duke Street, Alexandria, Virginia 22314-3492; or fax your survey to (703) 549-2772. The deadline is Saturday, October 31, 1992. Thank you for your participation.

INSTRUCTION BOOKLET

COMPARATIVE COSTS AND STAFFING SURVEY

1991-92

APPA: The Association of Higher Education Facilities Officers

INTRODUCTION

The APPA Information Services Committee is compiling data for the 1991-92 Comparative Costs and Staffing Report for College and University Facilities.

This is the only comprehensive survey of costs and staffing of physical plants in higher education. Institutions submitting questionnaires will be identified in the report so that users can contact them directly to compare information.

GENERAL INFORMATION

All institutions should report costs in their local currency. These figures will not be converted to U.S. dollars. The fiscal year is a twelve-month accounting cycle that ends no later than September 30, 1992 and covers the operating year spanning the 1991-92 period. Where necessary, please project final costs for that period.

DEADLINE

The deadline for inclusion in the final report is October 31, 1992. Please return the completed survey diskette to APPA in the original mailer by affixing the return address sticker to front of the package. Do not include unused survey diskettes. If unable to complete the survey on diskette, you may include a note requesting a written survey. Send via first-class postage.

Written surveys may be mailed to: APPA Comparative Costs Survey, 1446 Duke Street, Alexandria, Virginia 22314-3492. Or fax your survey to APPA at 703-549-2772.

If you have any questions, please call Wayne Leroy or Steve Glazner, APPA office, 703-684-1446. We request that the chief physical plant administrator review all data submitted in order to help ensure accuracy and consistency. Upon publication, one complimentary copy of the report will be sent to each responding institution.

SECTION ONE: GENERAL DATA

LINE 1. Fice #. The Federal Interagency Commission on Education number assigned by the U.S. Department of Education. We will insert this number for you if left blank. We will assign a number to institutions outside the U.S.

LINE 2. Institution. The institution name on the official institutional letterhead. Omit the word "the" at the beginning of your school's name. Do not use abbreviations. Main campus and branch campus sites should coordinate responses to this survey in order to avoid duplication of data or non-responses.

LINE 3. Person completing survey. The individual responsible for the survey. This person should be able to answer questions if called by APPA. This name is not published but is used to clarify data. NOTE: The institution's complimentary copy will be sent to this person's attention.

LINE 4. Location. The exact mailing address for the person completing the survey. Use the two-letter state or province abbreviation. Others should write out the geographic designation, including name of the country. Also, provide phone number and zip/mail code.

LINE 5. Regional affiliation. The APPA region in which your institution resides.

LINE 6. Choose the description that best matches your institution's academic program, from the list below (taken from the 1987 Carnegie classifications).

1. Research Universities: offer a full range of baccalaureate programs, are committed to graduate education through the doctorate degree, and give high priority to research.
2. Doctorate-Granting Universities: a full range of baccalaureate programs, plus a commitment to graduate education through the doctorate degree.
3. Comprehensive Universities and Colleges: baccalaureate programs and, with few exceptions, graduate education through the masters degree.
4. Liberal Arts Colleges: primarily undergraduate colleges that award more than half of their baccalaureate degrees in arts and science fields.
5. Two-Year Community, Junior, and Technical Colleges: certificate or degree programs through the Associate of Arts level and, with few exceptions, offer no baccalaureate degrees.
6. Professional Schools and other Specialized Institutions: degrees ranging from the baccalaureate to the doctorate. At least 50 percent of the degrees are in a single specialized field. Includes theological seminaries and Bible colleges, medical schools and centers, schools of law, engineering, business, art, or music, teachers colleges, etc.
7. Other.

LINE 7. Medical/health facilities. If your institution has a medical center complex, complete a separate survey for the complex, and exclude medical center cost data from information reported for the rest of the campus.

LINE 8. Type of institution. Indicate whether non-public owned or public owned.

LINE 9. Student enrollment. Fall 1991 full-time equivalent (FTE) enrollment.

LINE 10. Total campus building area. The sum of floor area located within the outside faces of exterior walls for all stories or areas, in outside gross square feet (GSF). Include all areas used by the institution, including residence halls, food service operations, bookstores, and other auxiliary enterprises.

LINE 11. Total campus improved grounds acres maintained. The total number of improved acres maintained on your central campus.

SECTION TWO: COST AND STAFFING DATA

Please indicate in the first column whether functional responsibility is contracted. In accordance with the APPA-NACUBO Classification of Accounts, include all space for which physical plant provides services. The building area maintained (second column) Gross Square Feet may vary from line to line, depending upon the nature of service provided.

The last column refers to the portion of the total physical plant actual operating cost assigned to the performance of each particular category. Include the total cost of labor, benefits, supplies, contractors, tools, and equipment.

LINE 12. Administration. All costs necessary to fulfill the duties of administration for all areas under the jurisdiction of physical plant. Include salaries, wages, employee benefits, travel, equipment, and other operating costs required for the chief administrator, assistant administrators of business management, and office personnel. Includes those assigned to payroll, billing, materials ordering, personnel records, work management, dispatching of work orders, shop scheduling, and planning for the physical plant organization. Other administrative operating costs include supplies, materials, prorated share of telephones, postage, computer rental, accounting costs, and career training programs.

LINE 13. Engineering/architecture. All costs necessary to fulfill the duties of engineering and design for all areas under physical plant's jurisdiction. Includes salaries, wages, employee benefits, travel, equipment, and other costs required to provide technical and engineering services necessary to complete functions assigned and funded in physical plant. Includes physical plant staff personnel such as engineers, architects, drafts persons, project estimators, contract administrators, and construction inspectors.

LINE 14. Building maintenance. Costs related to routine repairs, minor corrective maintenance, preventive maintenance, and service calls. The following are included:

1) Salaries, wages, employee benefits, travel, equipment, and other operating costs required to maintain the interior and exterior of buildings.

2) Work by outside contractors to perform building maintenance tasks.

3) Plumbing, heating, air conditioning, and ventilation.

4) Electrical repairs of all types, including primary and secondary systems, certain lamp replacements (requiring special ladders and rigging), and maintenance of outdoor lighting fixtures (excluding energy costs).

5) Carpentry and cabinet making.

6) Painting and glazing.

7) Hardware, locks, keys, closers, and records for same.

8) Roofing and sheet metal work, including downspouts and gutters.

9) Welding and necessary machine work.

10) Elevators and similar equipment.

11) Miscellaneous building repairs such as tuckpointing.

12) General-purpose classroom furniture and equipment within buildings, but not inventoried to a department.

13) Utility distribution systems inside buildings-- electrical, heating, process steam, water lines, gas lines, and sewer lines (storm and sanitary).

14) Operating and replacement costs of all equipment, materials, and tools used in building maintenance, excluding hand tools furnished by employees.

15) Elevator operation of non-automatic equipment.

Building maintenance may also provide services on a reimbursable basis to other accounts. Examples of these are auxiliary enterprises, alterations and improvements, new construction, experimental and special teaching support facilities, and departmental inventoried equipment. Do NOT include these figures in Line 14.

LINE 15. Custodial. Costs related to custodial services in building interiors, and exterior functions such as window washing.

1) Salaries, wages, employee benefits, travel, equipment, and other operating costs associated with custodians and supervisors required to clean buildings.

2) Work by outside contractors to perform custodial tasks.

3) Small setups in which materials are stored in buildings where they are used.

4) Snow removal on building steps plus five feet (or similar predetermined length) of sidewalk in each direction.

5) Operating costs such as paper, paper towels and tissue, wax, erasers, chalk, cleaners, and other materials and supplies.

Common operations include mopping, sweeping, and waxing floors (sanding and refinishing floors are excluded); dusting, polishing furniture and fixtures such as venetian blinds, partitions, pictures, maps, and radiators; cleaning chalkboards, trays, erasers, and replacing chalk; washing and dusting walls; cleaning and disinfecting commodes and urinals; cleaning and washing other fixtures, walls, and partitions, and replenishing restroom supplies; emptying and cleaning waste receptacles; dusting and cleaning windows and other glass surfaces; sweeping and cleaning entrances; and opening and/or closing building doors and windows.

Custodial services may also be performed on a reimbursable basis to other accounts. Examples of these are auxiliary enterprises, alterations, and improvements, new construction, experimental and special teaching support facilities, and departmental inventoried equipment. Do NOT include these figures in Line 15.

LINE 16. Landscaping and grounds maintenance. Costs to operate and maintain campus landscapes and grounds, including snow removal.

1) Salaries, wages, employee benefits, travel, equipment, and other operating costs associated with all supervisory and operating personnel.

2) Work by outside contractors to perform landscaping and grounds maintenance.

3) Maintenance of all areas of the campus: growing plants, trees, grass, shrubs, flowers, nursery stock, seed, fertilizers, and plant materials.

4) Maintenance of roads and walks, parking areas, irrigation systems, signs, and other landscape features.

5) Snow removal.

6) Maintenance of physical eduction, intramural, and ROTC drill fields.

7) Maintenance of open-ditch drainage, fences, retaining walls, and riprap.

8) Care of miscellaneous fixed equipment such as benches and shelter houses.

9) Operation and replacement costs of all equipment used in connection with grounds maintenance.

Landscape and grounds maintenance may also provide services on a reimbursable basis to other accounts. Examples of these are auxiliary enterprises, alterations and improvements, new construction, experimental and special teaching support facilities, and departmental inventoried equipment. Do NOT include these figures in Line 16.

LINE 17. Utilities production and distribution systems. All costs for heating, cooling, light and power, gas, water, and other utilities necessary for physical plant operation, EXCLUDING the cost of fuel and purchased utilities.

1) Salaries, wages, employee benefits, travel, equipment, and other operating costs associated with all supervisory and operating personnel in connection with utilities.

2) Operation and maintenance of heating and power plant equipment, including water and sewage disposal plants.

3) Operation and maintenance of central control systems and energy management systems.

4) Operation and maintenance of equipment in central air conditioning plants, unitary air conditioners, window units, etc.

5) Operation and replacement costs of all equipment used to produce utilities.

6) Maintenance of utility tunnels, outdoor distribution systems to the building wall for electricity, gas, steam, compressed air, chilled water, high-temperature water, domestic water, and sanitary and storm drains (not including open-ditch drainage).

LINE 18. Solid waste disposal. All cost associated with the removal of refuse (trash collection) from the campus. If refuse removal is contracted to a vendor please indicate by inserting the letter "C" in column two of section two.

LINE 19. Hazardous waste disposal. Costs associated with the removal of hazardous material, if physical plant is responsible. Examples include PCBs, motor oil, paint, solvents, and, in the case of medical centers, infectious waste. If hazardous waste disposal is not a physical plant responsibility, do not include these figures in line 19.

LINE 20. Security. All expense items for which physical plant is responsible, such as the cost associated with providing primary law enforcement, traffic, parking, and building security. Include salary, wages, employee benefits, travel, equipment, and other operating costs in connection with the operation of the police and security function.

LINE 21. Motor pool. All net cost associated with the operation of a motor pool. Include all expense items for which physical plant is held responsible, such as maintenance and repair of physical plant vehicles, campus vehicles, heavy equipment, etc. Include salaries, wages, employee benefits, travel, equipment, and other operating costs associated with all supervisory and operating personnel in connection with the operation of the motor pool. Do NOT include costs that are reimbursed by other departments. Be careful not to duplicate expenses already reported in preceding cost and staffing data.

LINE 22. Deferred maintenance budget. Total dollars budgeted in FY 1992 for capital renewal and deferred maintenance activities. Deferred maintenance is defined by APPA and NACUBO as maintenance projects from prior years and the current year that were not included in the maintenance process because of perceived lower priority status. Deferred maintenance includes postponed renewal and replacement maintenance and unperformed unscheduled major maintenance.

LINE 23. Total outstanding amount of capital renewal/deferred maintenance as of the end of FY 1992, derived from institutional or system formula, facilities self-audit, or other means.

LINE 24. Total net physical plant FTE as of July 1992. The all-inclusive employee count, in FTE, for all areas reporting to physical plant.

LINE 25. Benefits as a percentage of total compensation. The department's total net benefits cost (insurance, retirement, etc.), excluding the cost of sick leave and vacation. This percentage may be available from the institution's Human Resource Services Department.

SECTION THREE: PERSONNEL DATA

Indicate the total number of employees in each of the twenty-one job categories. Indicate which of the categories are covered by a (U) collective bargaining agreement, or (C) contracted to an outside vendor. Use annual salary during current fiscal year. Where applicable indicate the hourly shop rate charged to customers.

LINE 26. Chief facilities officer. The highest ranking administrative officer responsible for the operation and maintenance of the physical plant for the institution. Titles such as director of physical plant, vice president for facilities, associate or assistant vice president or vice chancellor, director of facilities management, and superintendent of buildings and grounds are common. An institution may report more than one individual in this line when primary responsibility for activities such as planning, construction, and maintenance of facilities are separated within the institution.

LINE 27. Associate/assistant physical plant administrator. Responsible to the chief facilities officer. In charge of assigned functions with a minimal amount of supervision.

LINE 28. Chief/superintendent of maintenance. Responsible for one of the major maintenance functions in the physical plant department.

LINE 29. Trades shop supervisor/foreman. First- or second-line supervisory position responsible for directing the daily work of skilled and non-skilled employees. An individual shop could have one person in this position for a small crew and one or more assistants for larger crews.

LINES 30, 31, 32, 33, 34, 35 and 36. Some of the skilled trades found in physical plant organizations: electrician, HVAC, pipe fitter/plumber, carpenter, general zone maintenance worker, auto mechanic and painter.

LINE 37. Grounds superintendent. Responsible for the overall landscape and grounds maintenance operation.

LINE 38. Grounds supervisor/foreman. First- or second-line supervisory position responsible for directing the daily work of skilled and non-skilled grounds employees.

LINE 39. Groundskeeper. Semi-skilled trade above that of common laborer. The position requires knowledge in the operation and maintenance of grounds equipment and the care and maintenance of landscape materials.

LINE 40. Laborer. Labor requiring no specialized skills, under the direct supervision of a skilled craft tradesperson, labor hauling and moving crew foreman or a grounds leadperson. Laborers are expected to know how to operate light equipment and perform tasks associated with the skilled trades of a common laborer.

LINE 41. Custodial superintendent. Responsible for the overall housekeeping operation.

LINE 42. Custodial supervisor/foreman. First- or second-line supervisory position responsible for directing the daily work of non-skilled housekeeping employees.

LINE 43. Custodian. Performs duties such as cleaning interior surfaces, dusting, window washing, replacing supplies, and other duties commonly associated with the position.

LINE 44. Business/budget manager. On-staff person responsible for plant accounting and budget matters. This typically includes monthly financial reports and annual budgets.

LINE 45. Support (secretarial/clerical) staff. Includes typical clerical or secretarial staff.

LINE 46. Storekeeper/expediter. Responsible for the physical plant storeroom. Typical duties include purchasing, inventory control and billing.

LINE 47. Other. The name of another category of worker, if any, for which your institution maintains cost of labor data. Please be careful to avoid duplication with any of the above categories.

SECTION FOUR: ENERGY AND UTILITIES COST AND CONSUMPTION DATA

We realize that different geographical areas often use a variety of units of measurement. However, uniformity of results can best be accomplished if all responses are provided in the standard units of measurement shown on the survey form. Most utility companies will assist you with conversion formulas from one unit to another. YOU are the most qualified person to provide this information in the correct format. Project all costs for the fiscal year 1992.

LINE 48. Electricity purchased. Kilowatt hours (kwh) of electricity purchased for FY 1992. Under Cost Per Year, insert the total cost of the electricity for FY 1992.

LINE 49. Electricity cogenerated. Kilowatt hours (kwh) of electricity cogenerated for FY 1992. Under Cost Per Year, include the total cost of the electricity cogenerated.

LINE 50. Natural gas purchased from any source. MMBTUs of natural gas purchased for FY 1992. Under Cost Per Year, insert the total purchased cost from any source (include any transportation cost, special tariffs, etc.)

LINE 51 and 52. Fuel oil. Gallons of oil purchased for each oil grade identified for FY 1992. Multiply barrels by 42, and imperial gallons by 42/35, for U.S. gallons. Under Cost Per Year, insert the total cost of oil purchased for each oil grade.

LINE 53. Coal. Tons of coal purchased for FY 1992. Under Cost Per Year, include all costs associated with the purchase of coal (mine cost, storage costs, transportation fees, testing expenses, etc.)

LINE 54. Other energy sources. If your campus uses any alternate source of energy, identify it by name under Utility Type. Specify the unit of measurement under Unit, and the total FY 1992 cost for that type of energy source under Cost Per Year.

LINE 55. Water. The amount of water consumed during FY 1992, from all sources. Express volume in terms of 100 cubic feet. (Conversion: 7.48 gallons per cubic foot). Under Cost Per Year, insert the total cost of water consumed during 1992.

LINE 56. Sewer. See instructions for Line 55.

LINE 57. Water and sewer combined. If you receive a combined bill for water and sewer, and only if the costs cannot be separated, use this line. Otherwise, leave this line blank. Follow the instructions provided for Line 55.
